The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A) It is unclear how many ingredients are required by claim 1, and what they are.

B) In claim 1, 'material temperature' is unclear, especially as to how it differs from 'temperature'.

C) The preamble of claim 1 is unclear. Perhaps 'a diamond' is meant.

Claims 1-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no disclosure of how to form a laminate of diamond with another material, particularly a material such as a polymer or paper.

The claims are so unclear that a meaningful search and application of the prior art is not possible, however the following is offered for the sake of completeness:

Claims 1-22 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Lundin et al. 5103701.

The previous rejection is incorporated herein by reference.

Applicant's arguments filed 10/11/07 have been fully considered but they are not persuasive. 'material temperature' is still unclear. According to the response, the term 'material' is unnecessary, since the phrase 'diamond has a temperature' already differentiates from the temperature of the reactor. Deletion will be permitted after-final. Claim 1 is self-contradictory. Is

diamond the matrix? If so, what is inside the matrix? If not, what is the matrix? How can the diamond have a greater ductility than itself? The specification does not shed any light on this, nor explains how to make a composite of diamond-paper. Is this old and known? If so, then an IDS thereto should be submitted, and/or Jepson format used.

Arguments to process steps are not persuasive; no difference in the product has been shown.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication should be directed to examiner Hendrickson at telephone number (571) 272-1351.
